6. (Points: 3)
Which of the following is an example of ambient intelligence in a domestic environment?

- 1. A solar-powered garden composter that rotates automatically.
- 2. Heat-sensitive lighting that switches itself on when a warm object is detected by a sensor.
- 3. A vacuum cleaner that maps out the floor area in a house, cleans it and plugs itself into a socket to recharge when necessary.
- 4. A hooded jacket with micro speakers in the hood that link to a portable radio receiver embedded in the sleeve.
- 5. A fridge that automatically sends a message to an online supermarket, ordering eggs when the egg-tray is empty.
