## **Objective:**

Instructional designer and software trainer looking for a position in an established eLearning environment where I can apply over ten years of learning and development experience, pedagogic design and curriculum development skills.

## **Experience:**

## **Instructional Designer**

10/10/2016 to present

Lockheed Martin

- During the initial customer consultation, established the learning requirements and outcomes of the project for a student centered learning experience
- Project management of the product including resources and media specialists to deliver the project on time and within budget
- Collaborating with the SME's, customers and internal stakeholders to design and develop the learning content to best practices and guidelines
- Collaborating with the SME's to adapt and repurpose the existing PowerPoint training into appropriate interactive training
- Working with a team of media developers to design and develop the SME's ideas and create engaging interactive learning resources which enhance the student learning experience

#### **Technical Trainer**

03/01/2012 - 9/10/2016

Dyson Ltd

Building close relationships with key stakeholders in all parts of Dyson (UK & SEA), I have produced eLearning resources used across the world for L&D, examples of which are as follows:

- Developed the global graduate training program, delivered over 2 years, including producing f2f and online training material for both systems and nonsystems training
- Design and development of the f2f training, webinars and on-line learning required for the bespoke HR recruitment and Oracle LMS system
- Produced eLearning interactive resources for technical training for RDD

## Instructional Designer

2010 - 2012

Kaplan International Colleges (KIC)

- Produced interactive games and an on-line learning environment for children, working closely with external graphic designers and key stakeholders in Israel
- Designed learning material and EFL courses for Interactive whiteboards and Moodle
- Provided standards, designs, templates and activities for all EFL courses delivered face to face and virtually using a variety of eLearning tools and graphic packages

## **Learning Technology Support Officer**

2005 - 2010

London Metropolitan University, London

Project Management (Prince2)

- Managed rollout of the LMS, including module migration and managed a multidisciplinary team
- Submitted proposals for increasing resources and the evolving e-learning strategy
- Ran showcases to disseminate and demonstrate best practice

## Training and Material design

- Analysed existing training provisions by conducting surveys and interviews
- Designed, developed, delivered and managed training and support programs
- Provided professional and bespoke services, using scenario-based training

## **Amanda Wilson-Kennard**

#### Research

- Technologies suitable for the academic environment
- Techniques for effective summative and formative feedback
- E-Assessment and diagnostic testing for ascertaining shortfalls in training

Director 2002 - 2005

Webergy Ltd

IT consultancy, project management and website design for SME's and the education sector including:
